

AI

Self-learning expert system analyzes constellations in complex multi-project environments

- ◆ AI makes non-binding recommendations for action
- ◆ Users still have full control – nothing is triggered automatically
- ◆ User's assessment becomes part of the AI

AI Assistance for humans

ADVANTAGES

Overview of complex situations

Time savings when analyzing risk situations

BENEFITS

Enables fast and targeted intervention

Reduces costs and frees up time for other important project tasks

You'll always be using the right staff. That much is certain.
