Your individual Ramp-Up
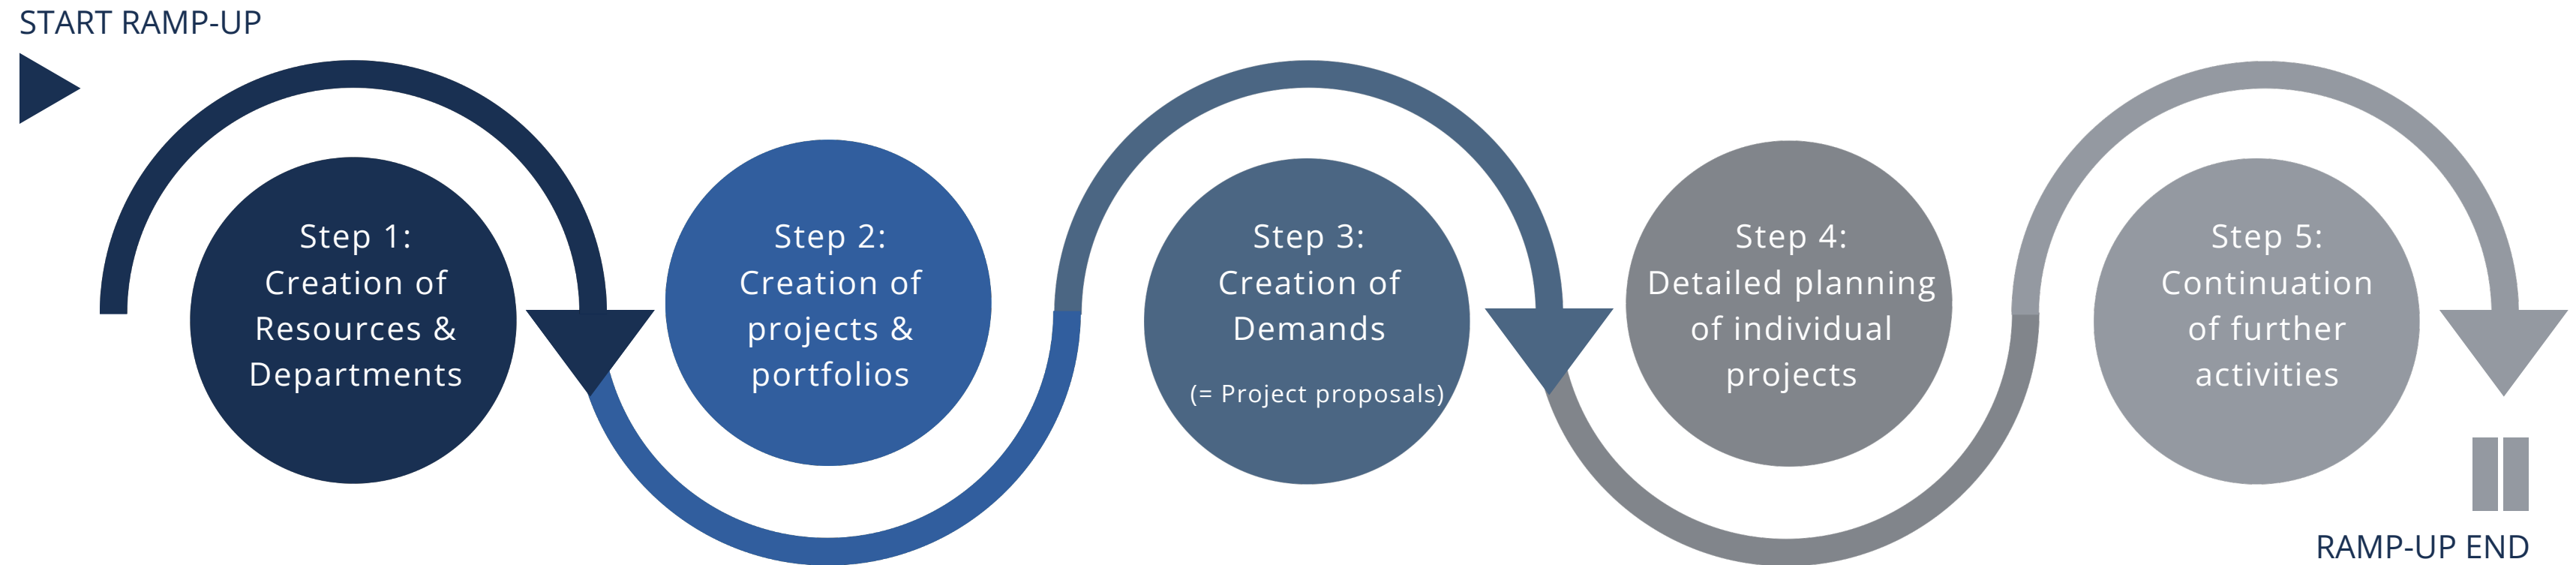

After each step, you decide whether you want to continue the ramp-up or stop it. No need to make a large investment.

cando

START RAMP-UP

Step 1:
Creation of Resources & Departments

Step 2:
Creation of projects & portfolios

Step 3:
Creation of Demands

(= Project proposals)

Step 4:
Detailed planning of individual projects

Step 5:
Continuation of further activities

RAMP-UP END

TIME EFFORT / UNIT

- (15 seconds per person) Laying out the employees
- (1 minute per person) Definition of basic loads
- (15 seconds per person) Creation of annual vacation schedule
- (15 seconds per department) Creation of departments

- (5 minutes per project) Recording of all running projects (title, start-end, resource, department)
- (5 minutes per portfolio) Creation of portfolios
- (30 minutes per portfolio) Summary of projects in portfolios

- (5 minutes per request) Capture of all Demands including priorities, scores
- (30 minutes per portfolio) Summary of the Demands in portfolios

- Detailed planning, time expenditure between 1-4 hours per project
- Project tracking with employees
- Connection to Jira if required

- Budget management
- Financial and cost planning
- Connection of further systems, e.g. SAP

RESULT/ RAMP-UP-STEP

- Basic availability of all employees and teams
- Display of the workload that is "NOT" available for projects

- Capacity utilization per project/portfolio
- Who-does-what-when?
- AI risk analysis of resource overloads

- Feasibility analysis of all future planned projects and the available resources / capabilities

- Involvement of employees, status of tasks and efforts
- Classic and agile planning combined in one system

- Complete project controlling
- Avoidance of double entry and inconsistencies

Here is a Can Do blog post on the topic of "Implementation of enterprise software".
