

Can Do Implementation – Typical Project Timeline

Can Do Implementation – First Steps

What to expect during the 6-month implementation phase

Project Support & System Configuration

- Personalized consulting from experienced consultants
- Setup and customization of the Can Do software to your specific requirements
- Regular project meetings and stakeholder training

Use of the Software with 5 SaaS Licenses

- Full functionality for your key users
- Flexible use across different project roles
- Best practice approaches

Typical Results after 6 Months

- Projects and resources are mapped in Can Do
- Full transparency over capacities and workloads
- Initial AI-based analyses for optimizing your project landscape
- Your key user team works independently with Can Do
- Know-how transfer from Can Do consultants to your project team
- Solid foundation for further (company-wide) roll-out
